

Desert Hills

For Veterinary Services Co. Ltd.

Desert Hills for Veterinary Services Co. Ltd. (DHV) is kingdomwide supplier of broiler and layer hatching eggs and day old chicks. We are supplier of the top brands in poultry genetics.

Hatching Eggs

Hatching of eggs refers to the production of baby chicks. Incubators are used at present for hatching of eggs, which provide more efficient production.

At Desert Hills for Veterinary Services Co. Ltd. (DHV), we are keen to provide our clients with high-quality selected hatching eggs either locally produced or selected from reputed international company from Europe and Turkey specializing in hatching egg production.

We pay specific attention, for our locally produced hatching eggs, to strict breeder management process, vaccination program and biosecurity procedure ensuring high quality hatching eggs with zero incidents of transmitted disease.

Day Old Chicks

All our produced day old chicks go through a strict and specific attention to Hatchery management, biosecurity procedure to ensure high quality hatched chick with zero incidents of transmitted or hatchery born disease.

In terms of selling day old chicks to third parties, DHV is considered as market leader in the Kingdom of Saudi Arabia. DHV provides its clients with a comprehensive technical advice, high-quality vaccinated chicks against most common diseases to ensure high profitability of our client.

New Innovative Product

New natural feed additive products of French origin are added to Day Old Chick which impact on the quality of final product with low disease incidents and minimum cost without chemical antibiotics, thereby ensuring high profitability.
